EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims:

At last line of claim 1, "acceptable o the power supply." should read -- acceptable to the power supply.--

Claims 14-17 are rejoined, which depends directly/indirectly from allowed claim 1.

Election/Restrictions

2. Claims 1-19 are allowable. The restriction requirement among species, as set forth in the Office action mailed on 09/20/2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 14-17, directed to other species no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 20-29, directed to a method of operating an electrical

meter withdrawn from consideration because they do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1-19 are allowed.

4. The following is an examiner's statement of reasons for allowance: After reviewing of the prior art references, the Examiner found that Applicants' argument in the Remarks pages 6-9, filed on 12/21/2006 are persuasive for placing the claims 1-19 in a condition for allowance. They are allowed because no prior art has been found that meets the limitations of claims 1-19 calling for an electrical power meter having electronic components, wherein the electrical power meter receives alternating current (AC) voltage from an electrical power line, the meter comprising a power supply and a DC source in parallel circuit configuration with AC voltage to provide a DC bias voltage to the AC voltage, and the DC bias voltage maintains the AC voltage above a

predetermined voltage level acceptable to the power supply, as further defined at claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
